13h00 - 14h00	Lunch

THE PROJECT

The European project “Apprenticeships for NEETs” (ANEETS) aims to promote innovative forms of apprenticeship for vulnerable youth “Not in Education, Employment or Training” (NEET) developed by companies, professional integration actors and vocational training actors.

The project partners first carried out a European benchmarking on guidance and professionalisation measures of apprenticeship. As results of a close collaboration between companies and training centres, the ANEETS project publications highlight the necessary cooperation between the different integration and vocational training actors to enable NEETs to enter the labour market.

The final conference that we propose today is, first, an opportunity to bring together the organisations that actively participated in the implementation of this project, so that they present their commitment towards the NEETs and the means implemented to help them integrate professionally. Secondly, the ANEETS Toolkit, elaborated on basis of research and interviews with stakeholders, will be shared with all the participants.

Finally, this conference allows companies involved and those ready to act to exchange best practices. It is the synergy between the various stakeholders that will be honored on the occasion of this European event!
