A first project : Ecocentres 2.0

economic, cultural and social innovation

Create in Euro-Mediterranean cities different experiments of places for sharing and new generation e-activities, that are both evolutionary urban places, located in cities or suburbs and innovative features for life and work for sustainable cities

shared quality of life, wealth creation, sustainable development promoting boldness and solidarity

new kind of places for professional, public and recreational activities and services

changes in individual and collective behavior

Action plans

- writing scripts, specifications and monitoring indicators

6 working groups

Led in pairs : City / Company

Workshops Green & Connected Cities

- simultaneous launch in 2010 in Euro-Mediterranean cities of Ecocentres 2.0 experiments

A structured and progressive plan for implementation
